DETAILED ACTION

1. Acknowledgment is made in the receipt of the response filed October 7, 2004.
2. The terminal disclaimer filed on October 7, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application Number 10/600,731 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

3. Claims 4, 5 and 7-10 are allowed.
4. The following is an examiner's statement of reasons for allowance: the terminal disclaimer filed on October 7, 2004 has been approved and thus overcomes the obviousness-type double patenting rejection in view of 10/600,731 set forth in the previous Office action. The prior art of record fails to anticipate or render obvious a brake device for a vehicle comprising a spring brake actuator connected to a service brake actuator, wherein the energy stored in the spring brake actuator is controllably released to apply a supplemental rotational energy to a drive shaft of the service brake actuator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
